

PROX SENSOR KITS FOR TOILETS

OPERATION

The toilet is activated automatically when the user moves away from the sensor.

APPLICATION

Allows quick and easy modification of almost any traditional sanitary ware into an automatic touch-free one. It's widely utilized in environments requiring high level of hygiene, such as in hospitals, geriatric centers, prisons, restaurant kitchens and in the meat & fish industry. Being modular, it fits any interior and can be integrated with any existing water outlet. The solenoid valve is simply installed onto the water-line, allowing water to flow to the toilet.

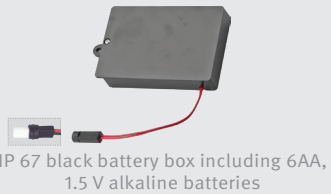

SPECIFICATIONS

Electronic sensor kit for toilet, activated by an infrared proximity sensor. Brass body with waterproof connector. Available with an IP67 battery box or a 9V transformer. Sensor range is adjustable by remote control. Other sensor settings (delay in, delay out and security time) can also be adjusted by remote control. Sensor features a low battery level indicator.

PRODUCT AT A GLANCE

Installation	Modular
Recommended Pressure	1.0-8.0 bar / 14.50-116 PSI With a pressure over 8 bar, use a pressure reducing valve.
Hygiene Flush	To maximize hygiene, this product is equipped with a 24 hours duty flush. The flush takes place after 24 hours of non use have passed. Prevents the trap seal from drying out, possible freezing of pipes, and gets rid of potential bacteria in stuck water. This function can be disabled using the remote control.

POWER SUPPLY OPTIONS

IP 67 black battery box including 6AA, 1.5 V alkaline batteries

9V Transformer

IP68 Switching transformer

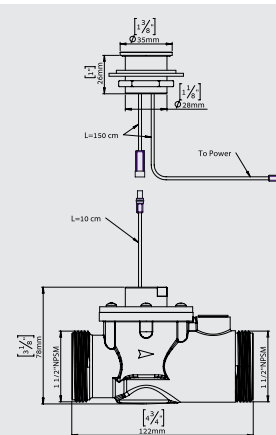

Transformer Junction box
